SYLLABUS STATEMENT

Examines contexts, theories, practice models and skill development in specialized fields of practice.

COURSE DESCRIPTION

This course will examine the interplay between relevant legislation and common law and social work practice. Legislation and common law are integral to social work practice. Having a working knowledge of potential legal issues, legislation and case law is imperative to being able to identify issues and seek assistance from legal resources and to advocate for clients. It is virtually impossible to provide direct client intervention without being impacted by a piece of legislation, policy or caselaw. Students will be introduced to relevant legislation and learn how to interpret legislation, including reviewing the Hansards and other resources that lead to the creation of legislation. Students will also have an opportunity to assess legislation and draft alternate language wherein they determine that current legislation either has a gap or is ineffective due to change in circumstance or environment. Students will further learn how to read case law, understand the make-up of legal decisions and learn to summarize case law into concise themes and learnings.

Students will be presented with various guest speakers. Students will also be given a courthouse tour and will be able to observe a trial. These additional offerings will assist the student in gaining frontline experiences and knowledge on various topics. In class, students will be taught in lecture format, through exercises and using case studies.

By the end of this course, students will be able to:

- 1. Have a broader understanding of the impact of legislation and common on their social work practice;
