Course Description

The focus of this course is on listening and languaging in the clinical interview. It is designed to be experiential in order for students to develop and practice more advanced ways of facilitating conversations that are effective in their clinical practices with clients. Use the specific populations as examples that might capture the issue of francophone, indigenous and newcomer populations

Learning Experiences

The primary modes of interaction in this course will be through discussion and experiential learning. Therefore, class performance includes 1) being in class, 2) contributing to the class discussion in a relevant and coherent way, 3) indicating through one's discussion contributions a thorough preparation of the assignment, 4) willingness to try and practice advanced skills, and 4) developing dialogue with the instructor.

Apply the same standards of behavior, communication, and courtesy about punctuality, attendance, and readiness for work that would apply to a professional social worker in meeting with clients, supervisors, or in attending agency meetings. In addition to attendance, grades for participation are based on asking questions, sharing experiences, actively participating in class discussions or small group exercises, and giving respectful feedback to others during class. It also includes using office hours as needed to ask for help, problem solve, and/or to clarify the assignments, or to identify individual learning needs. Above all, participation means demonstrating personal and professional engagement in the learning process.

If a situation arises that precludes class attendance, the student should apprise the instructor. It is neither the instructor's responsibility to determine why a student was not in class nor is it the instructor's responsibility to advise the student of what was missed by a student's absences or tardiness to class. Your absence deprives the class of your participation that day so if you must be absent, consider ways you could add to the class upon your return. Then create a plan (containing activity and timeline) that will adequately substitute for that class time missed, present that plan to the instructor for approval, and execute that plan.

Our suggested classroom routine:

1. What you tried this week that was new for you
2. Assignment discussion
3. Topical mini-lecture/discussion
4. Demonstration/exercise
5. New assignment

6. Creating a compendium of questions—add to D2L

Relationship to Other Courses

This course is an elective that is directly related to SOWK 696 Practicum, SOWK 653, and SOWK 657 because of the emphasis on the careful examination of conversations held directly with clients. It is also related to research practices that benefit clinicians in the field.

Course Text(s)

There is no required text for this course. Our main text will be constructed from process recordings of interviews with clients seen in the practicum setting. There are assigned readings and videos that are listed in the course schedule for each week. These can be accessed online or on D2L.

Assignments

This is an experiential practice class with a regular out of class assignment.

Because of the practice nature of this course, the majority of your grade is awarded for full participation in the classroom activities. Therefore 60% of the course grade is based upon class participation and contribution both to the large group discussions (make sure you have the reading prepared for discussion) and small group activities. Quantity is not the issue. Your grade will be determined by my ability to comment on the way you think and make sense of concepts and new practices. To make this clear, I suggest that when you make your discussion contribution you mention with specifics what class readings you are connecting and referring to even as you talk about your own experiences, pose a question, or respond to another.

The remaining 40% of your grade will be determined by the 7 process recordings you are assigned and your report of researching your own practice. Each of these assignments will be handed in via D2L dropbox and will be worth 5% of your total grade. To be complete your process recording must be sent to me electronically by the end of Sunday before Monday class. Therefore if class is on January 15, then your process recording is due January 14. It must also have the highlights requested and comments in boxes (using Track Changes) as requested.
